```java
package com.tnsif.packagesandaccessmodifiers;

public class TestAccess {

 public static void main(String[] args) {

  AccessModifiersExample ame = new
AccessModifiersExample();
  ame.show();

  System.out.println("Public Variable: " + ame.publicVar);
  //System.out.println("Private Variable: " + ame.privateVar);
  System.out.println("Protected Variable: " +
ame.protectedVar);
  System.out.println("Default Variable: " + ame.defaultVar);

 }

}
```
